In relation to Internal Improvements he says: "Nature has been liberal in bestowing upon our State the elements of prosperity and happiness, but until these resources are developed by a liberal systen of internal improvements, our real advantages can perer be fully understood and appreciated. Without scilities for commercial communication, our citizens ne not presented with inducements to exert their industry and enterprize in bringing to light the hidden measures within their reach. Some portions of our Sate in which nature has been most lavish in her uricultural and mineral bounties, are so completely of from commercial facilities by surrounding mountain ranges, that little or no advancement can to wit: he made towards wealth and prosperity. I regard it be the duty of the State to exert her power in renoving the barriers to commercial intercourse, and go far as she has the means to enable all of her citigens to have easy access to the best markets for the products of their labor."

In relation to the election of Judicial officers by the people Gov. Trousdale says:

"I concur fully in the sentiment that the fundamental law of the State should not be subjected to frequent and inconsiderate charges. But experience may develop defects even in our Constitution, and to apply the necessary correction. Our constitution has now been in operation for about fifteen years, and it is matter for congratulation that its provisions are proved so satisfactory that few attempts have een made to disturb them by amendment.
